

Lesson 7: Creating Interactive Dashboards and Data Stories

- Design a basic dashboard layout using sheets
- Add filters and interactive controls
- Implement highlight and filter actions
- Use URL and set actions for interactivity
- Create dynamic dashboards using parameters
- Design dashboards for multiple devices
- Build a complete data story using Story feature

DATASET:

- Design a basic dashboard layout using sheets

The screenshot displays the Tableau Desktop interface. The top section shows the 'Connections' pane on the left, listing 'deliveries.csv' and 'matches.csv'. The main workspace shows a relationship diagram with 'deliveries.csv' and 'matches.csv' connected by a line. Below this, a table view of the 'matches.csv' data is shown, with columns for Match Id, Season, City, Date, Match Type, Player Of Match, and Venue. The table contains 6 rows of data.

Match Id	Season	City	Date	Match Type	Player Of Match	Venue
335982	2007/08	Bangalore	18-04-2008	League	BB McCullum	M Chinnaswamy Stadium
335983	2007/08	Chandigarh	19-04-2008	League	MEK Hussey	Punjab Cricket Association S...
335984	2007/08	Delhi	19-04-2008	League	MF Maharoof	Feroz Shah Kotla
335985	2007/08	Mumbai	20-04-2008	League	MV Boucher	Wankhede Stadium
335986	2007/08	Kolkata	20-04-2008	League	DJ Hussey	Eden Gardens
335987	2007/08	Jaipur	21-04-2008	League	SR Watson	Sawai Mansingh Stadium

The bottom section shows a dashboard layout titled 'Matches Won by Team.' with a large empty area for visualization. The 'Columns' and 'Rows' shelves are empty. The 'Marks' shelf is set to 'Automatic'. The 'Filters' shelf is empty. The 'Tables' pane on the left lists various fields from the 'deliveries.csv' and 'matches.csv' datasets.

b) Add filters and interactive controls

C: Implement highlight and filter actions

D: Use URL and set actions for interactivity

E: Create dynamic dashboards using parameters

F: Design dashboards for multiple devices

0

G: Build a complete data story using Story feature
